

CUMULUS / V1.0 · BRAND DOCUMENT

A calm, precise identity system for invisible orchestration between people, agents, and cloud infrastructure.

Cumulus

AI Delegation. Invisible Orchestration.

OPERATING FIELD

- 01 Autonomous agents
- 02 Workflow automation
- 03 Secure cloud execution
- 04 Calm operational control

STATUS ■ ONLINE

An operational document, not a coffee-table book.

Eleven spreads. Each one resolves one decision. Read in order to absorb the system; jump in to settle a single question.

Calm control at the moment of delegation.

Cumulus turns human intent into secure, reliable handoffs between people, autonomous agents, and cloud systems.

high-trust

VISUAL PRINCIPLES

01 Quiet control Hierarchy, spacing, and restraint communicate confidence.	02 Engineered symbol Curves, rails, and marks must feel intentional, never cute.
03 Grayscale first Color acts as a system cue, not a theme.	04 Infrastructure cues Reference routing, execution, and orchestration.

An engineered cloud with a quiet handoff rail.

The mark pairs a cumulus silhouette with an internal rail signaling delegation, routing, and secure transfer — never illustrative, never weather-app.

PRIMARY LOCKUP

Cumulus

AI delegation system

min • 132px

clear space • 1x cap height

SYMBOL ONLY

16 / 24 / 32 px favicon use

INVERSE / PAPER

monochrome only • no gradients • no shadows

Grayscale carries the system. Terracotta is a cue.

Reserve accent for focus markers, routing dots, and decisive moments of transfer.

NEUTRAL FIELD · 90%

ACCENT · 10%

A geometric sans with editorial restraint.

Tracking stays tight, hierarchy stays clear, technical language stays compact.

07 / 11

Cloud Rails — quiet infrastructure made visible.

Thin technical lines with deliberate endpoints and routing joins. Sparse terracotta markers used only for focus. Use as section divider, edge detail, or quiet surface texture — never as a full visual.

CLOUD RAILS • DENSITY 22 • SEED 11

1440 × 420 • sparse • directional

Thin lines. 24px grid. No flourishes.

The icon family draws from the same vocabulary as the mark — a closed cloud silhouette and a single rail. Stroke 1.4. Caps round. Joins round. No fill except for active nodes.

Move toward precision. Remove what feels loud.

DECISION RULE

If an element feels more decorative than operational, reduce it until the system feels calm again.

✓ DO

Engineered cloud

✗ DON'T

Bubbly weather cloud

✓ DO

Sparing accent

✗ DON'T
